Home page

Note:

The design of each of the pages, i.e. Home, hotels, Flights etc. is the same.

Navigation Bar:

Some of the headings in the navigation bar have a drop-down menu style. Hotels come down in six different options, such as: 1 star, 2 star, 3 star, 4 star, 5 star and all inclusive. Flights come with three different options: economy class, business class and first class. The Essentials come down with options: car hire, insurance, transport, attractions. And lastly the destination bar comes down into options of different continents: Europe, America, Africa, Asia, and Australia.

Search holidays:

Contains of departure airport, destination, from date, to date, how many adult, how many children and how many infants.

Contact Details:

We decided not to include a separate page for the contact details, as we thought it is needed for the contact details to be visible on each page. To make that happen we decided to put it in the header of each page as well as the footer.

Logo Icon:

Whenever the logo picture in the header is clicked, the page goes automatically to the home page.

Aleksandra – did the design by using Word

Yanika – did the design by using Paint

We both design our website together and also helping each other to write stuff in a Word document
